

Software Requirements Specification (SRS)

Mortuary Management System

MOSC Medical College, Kolenchery.

Date: 26-07-2025

1. Introduction

1.1 Purpose

The purpose of this document is to define the functional and non-functional requirements for the development of a Mortuary Management System for MOSC Medical College, Kolenchery. This system aims to streamline body registration, cabin allocation, billing, and body release processes in an efficient and traceable manner.

1.2 Scope

This system will manage and monitor the lifecycle of a body from the time of entry into the mortuary until it is released. It will handle registration, cabin allocation, document management, billing, discounts, reporting, and legal compliance for MLC (Medico-Legal Cases) and non-MLC cases.

2. Overall Description

2.1 User Classes

- Mortuary Manager
- Hospital Billing Staff
- Emergency Medical Officers
- System Administrator

2.2 Assumptions and Dependencies

- Integration with HIS for demographic and admission data
- Integration with hospital billing module
- Role-based access for different user levels
- Internet and intranet connectivity

3. System Features

3.1 Masters

3.1.1 Cabin Master

- Manage cabin number, status (Available, Occupied, Under Maintenance), and tariff details.
- Option to search, add, update, and deactivate cabin records.

3.1.2 Body Type Master

- Define body types: MLC and Non-MLC.

3.1.3 Discount/Concession Authority Master

- Maintain list of authorized personnel who can approve discounts.
-

3.2 Body Registration

3.2.1 With Hospital Number

- Search and auto-load patient data (name, gender, age, specialty, location, date/time of death, declared by, reason of death).
- Required filed to capture estimated days of stay.
- Details of Two witnesses.
- All fields optional.
- Auto-generate unique body number sequentially.
- Upload supporting documents.

3.2.2 Without Hospital Number (Outside Body)

- Manual entry of body details: name, gender, age, locality, date/time of death, declared by, reason of death.
- Required filed to capture estimated days of stay.
- Details of Two witnesses.
- All fields optional.
- Auto-generate unique body number sequentially.
- Document upload option enabled.

Need Option to capture Death intimation No and MLC no in body register screen.

3.3 Body Cabin Allocation

- View cabin availability via a color-coded browser:
 - Green: Available
 - Red: Occupied
 - Grey: Under Maintenance
- Allocate body to selected available cabin.
- Cabin allocation screen to support:
 - Advance collection entry
 - Hourly charge calculation (automated posting based on time duration).
 - Min hours / free hours configuration needed

3.4 Mortuary Billing

- Final billing triggered/Freeze when cabin is marked Body Release.
- Final bill displayed in "Pending Mortuary Bills" section.
- Add optional services (e.g., body dressing charge).
- Apply approved discounts at the time of settlement.
- Display mortuary settled invoices in the Emergency module.
- Need icon against settled invoices in ED for Manual consumption entry for materials (cotton, gauze, etc.) used in procedures. Consumption reason set as Mortuary usage by default as mandatory.

3.5 Body Release

3.5.1 Non-MLC Cases

- Capture name of Body taken by
 - Relationship
 - Address/locality
 - Contact number
 - NOC/PCC certificate upload
 - Body release date/time auto-captured
 - Option to upload legal documents
- After bill settlement, mark body as released.
- Color indication in mortuary dashboard for status.

3.5.2 MLC Cases

- Additional fields and uploads required:
